

Drieasy

Ugadell Design

Drieasy 300ml mug

The most significant feature of this mug is its quick-drying property after being washed in a dishwasher. Even when the mug is placed straight down in the dishwasher without tipping it, the special tilted bottom enables water to be discharged by flowing down the handle. Because the mug dries completely with no remaining water or bits of food, it is hygienic and no second washing or drying is necessary. Although it looks like an ordinary mug at first glance, this mug is manufactured with advanced technology in Mino Region, Japan – an area with a 1,300-year history of ceramics production. The meticulous design of this mug gives it the following functionalities: it is less likely to get dirty, easy to wash, and powdered food/drinks can be easily dissolved in it. Well adapted to the modern lifestyle, this is a mug of happiness designed for comfortable and convenient use not just when drinking from it but all the way to putting it back into the cupboard.

Quick-drying

Drieasy 300ml mug

Safety

Powdered food/drinks can be easily dissolved in it

Easy to wash

It is less likely to get dirty

Hygienic
